Who We Are

Pryor Technical Solutions is a locally-based IT Service Provider based out of the Conception Bay South area. We provide comprehensive IT support to clients and businesses in everything from computer repair, to rolling out enterprise solutions.

Our approach to supporting businesses is simple: support small to achieve big goals. We help businesses and clients alike achieve success with expert advice without the traditional overhead that other IT providers come with. Our agile approach allows for us to be flexible for our clients no matter the occasion.

Cloud & Enterprise Computing

Your business, no matter how big or small will always need IT infrastructure. Where that infrastructure resides, we can help you establish.

We partner with some of the world's leading cloud providers to help businesses transition to the cloud, create hybrid environments, and provide strategic insights into enterprise solutions for employee and client success. Whether you are standing up your first cloud resource, or looking how to integrate your cloud resources with your physical infrastructure, we can help you make that happen.

Website Design & Software

Businesses thrive on digital presence and streamlined operations—and that's where we come in.

We specialize in building modern, responsive websites and custom software solutions that elevate how your team works and how your customers engage. From eye-catching designs to robust, scalable applications, our team crafts digital experiences that reflect your vision and deliver measurable results. Whether you're launching your first site or transforming legacy systems into agile tools, we provide the strategy, creativity, and technical expertise to make it happen.

Security

You deserve peace of mind when it comes to security—and we're here to make that happen.

We offer comprehensive security solutions that protect your digital infrastructure, safeguard sensitive data, and ensure compliance across every layer of your organization. From cybersecurity assessments and threat detection to managed security services and employee awareness training, our team helps you build a resilient environment that evolves with today's risks. Whether you're fortifying your first firewall or enhancing a mature security posture, we help you stay one step ahead.

Media Services

Graphic Design

From logos and brand assets to marketing materials and UI design, we create stunning visual content that connects with your audience and strengthens your identity. Our graphic design services combine strategic thinking with creative flair, ensuring every pixel serves a purpose. Whether you're crafting a new brand or refreshing your look for the digital age, we bring your ideas to life with impact and consistency.

Video Production

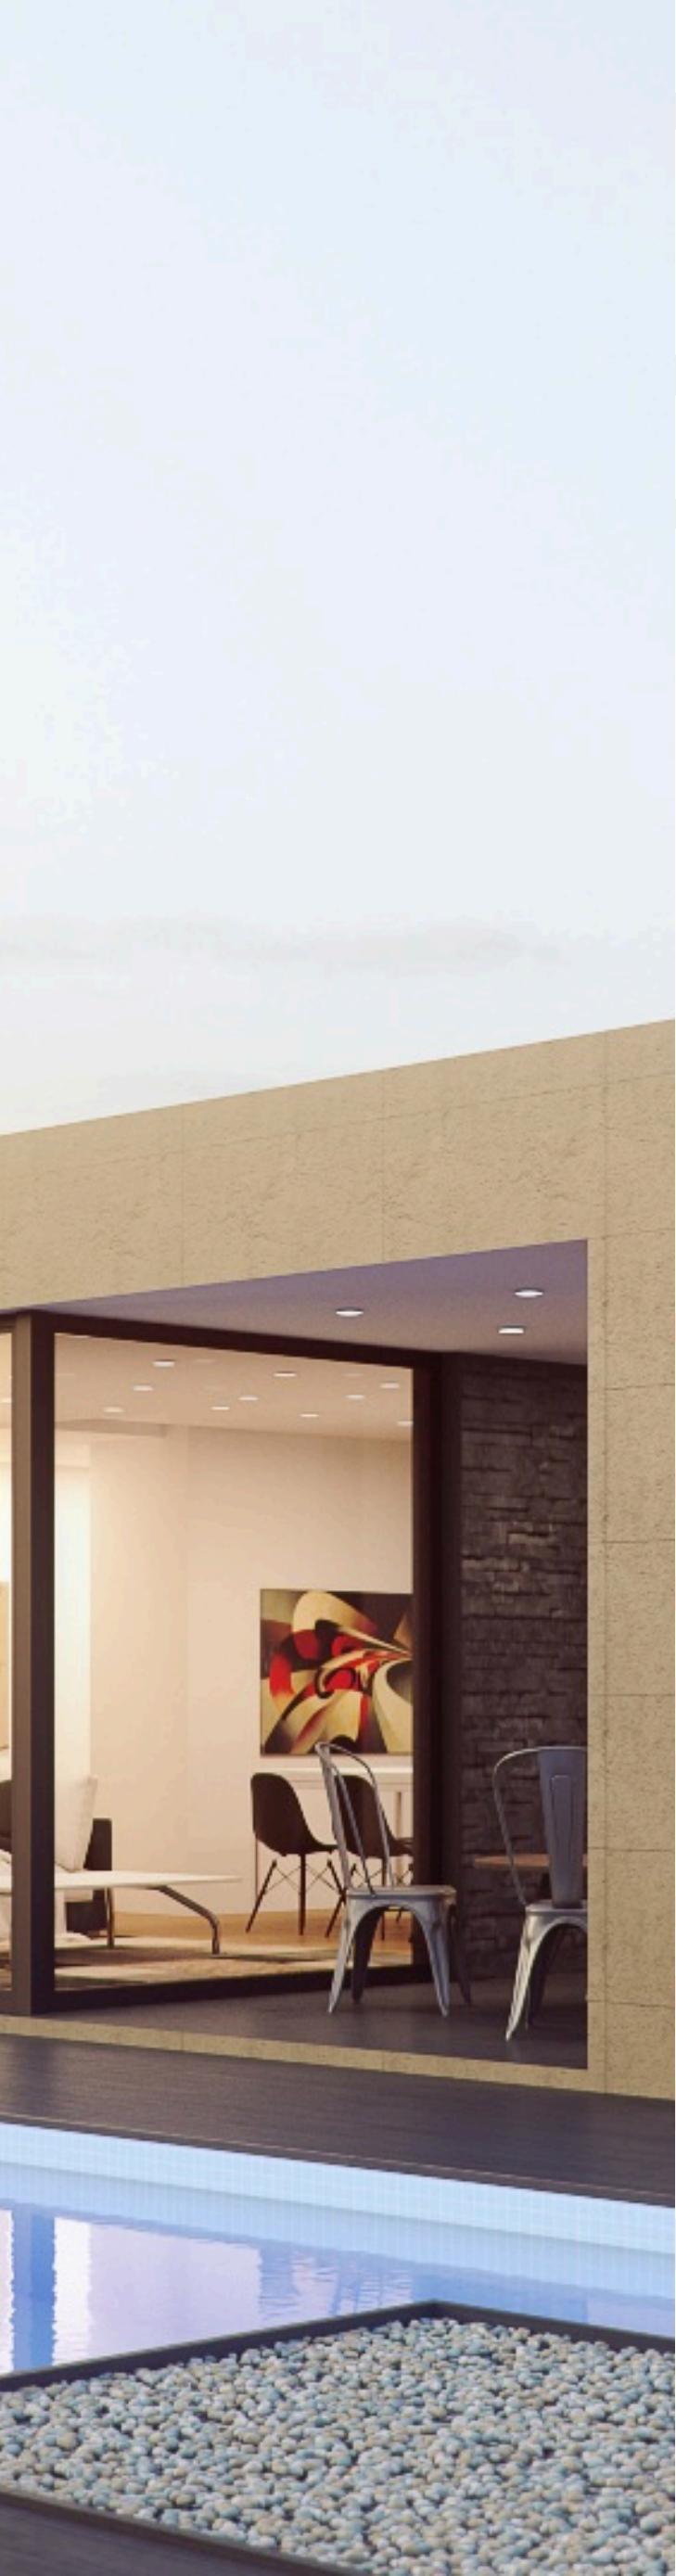

We create videos that elevate your brand, engage your audience, and drive your message home. Whether it's promotional content, training materials, testimonials, or cinematic storytelling, we handle every detail with precision and creativity. With a focus on professional visuals, seamless editing, and targeted distribution, we bring your vision to life in a way that truly resonates.

Drone and RPAS Services

Whether it's aerial inspections, cinematic videography, asset management, or mapping and surveying, we deliver high-quality drone solutions tailored to your needs. Our team leverages cutting-edge RPAS technology to provide real-time insights, enhanced visuals, and safe access to hard-to-reach places. From planning and flight operations to post-production and analytics, we ensure compliance, precision, and creativity at every altitude.

3D Modelling

We transform captured data and conceptual designs into fully realized 3D models, ready for visualization, simulation, and physical creation. Whether you're scanning real-world environments, prototyping new products, or showcasing architectural visions, we combine cutting-edge modelling software with high-quality 3D printing to ensure your concepts become tangible. From design refinement to material selection, we provide end-to-end support that bridges the digital and the physical with stunning results.
